

ENE3 @LISBOA

5th National Student Gathering Electrical Engineering

Lisbon

3 the September 6, 2014

The EVENT

5th National Meeting of Electrical Engineering Students

THE 5th edition of the National Meeting of Electrical Engineering Students will be first performed in Lisbon at the Instituto Superior Técnico of Lisbon. The organization of the meeting consists of core students of Electrical Engineering and Computer Students and has the support of the area and the institution's department.

Campus Alameda

As the Integrated Masters Engineering in Electrical and Computer is associated with the pole of Alameda, it is here that the ENE3 held mainly in spaces prepared to receive the participants, and which will be carried out various activities within the academic context of the meeting.

Participants will also have the opportunity to visit some research centers and laboratories such as the Institute of Systems and Robotics, the Institute of Telecommunications and INESC ID.

"The university campus of Alameda was built under the direction of Duarte Pacheco [...] Concebe the first autonomous campus of the entire Portuguese university system. The campus is located in one of the most central areas of Lisbon, benefiting from the public transport network [...]"
(in <https://tecnico.ulisboa.pt/en/about-tecnico/campus/>)

Campus TagusPark

The facilities of this center will be visited and some activities will be carried out on site.

This pole is associated with courses in the area in focus, such as Electronic Engineering and Telecommunications and Information Technology Engineering.

The EVENT

5th National Meeting of Electrical Engineering Students

The meeting also has a cultural component, whose objective is to make known the city of Lisbon to the participants.

It is intended that all have the opportunity to enjoy the largest city in the country, passing through the most characteristic places of the same.

This component intends to have a playful aspect, giving to know the heritage, history and architecture of the city of the Seven Hills, giving at the same time the possibility of the participants to relax and enjoy the visits.

The visit will mainly take place in the riverside area of Lisbon, which houses the most paradigmatic neighborhood in terms of heritage related to the discoveries.

Program

5th National Meeting of Electrical Engineering Students

The ENE3 program will then have several types of activities in the Electrotechnical area:

Speeches

Discussion Board Workshops

Visits to research centers Visit to the company Technological exhibition

SPONSORSHIP

5th National Meeting of Electrical Engineering Students

Having said this, the organizing committee of the 5th ENE3 hereby proposes a partnership between your company and this event, contemplating the following activities:

Disclosure of the company logo in the offer folder Placing posters in the ENE3 sites Banking in the technological exposition

DISCLOSURE OF THE COMPANY'S LOGOTYPE

5th National Meeting of Electrical Engineering Students

DESCRIPTION

This package consists in the dissemination of the company logo in all the means that the ENE3 has at its disposal.

MEANS OF DISCLOSURE

Official website of ENE3 <http://ene3.tecnico.pt>

Official page of ENE3 on facebook
<https://www.facebook.com/ene3lisboa>

Clothing & Accessories

Posters to be displayed in various places of the Instituto Superior Técnico and other Colleges throughout the country

Flyers

Contains the ENE3 program and other useful information

Canvas

Large strips placed in the main entrances of the IST Campi

MERCHANDISING IN PASTE PROVIDED

5th National Meeting of Electrical Engineering Students

DESCRIPTION

Consists of the placement of informative content or other type of merchandising in the reception kits that will be distributed to all participants of the event. These include:

Flyers / brochures
Recruitment Forms Gifts

Other content not mentioned may also be considered, provided it has previously been agreed with the organizing committee.

PLACEMENT OF POSTERS IN THE PLACES OF ENE 3

5th National Meeting of Electrical Engineering Students

DESCRIPTION

It consists of the placement of informative posters in the places of the event:

Alameda Campus
Tagus Park Campus

The posters will be posted in the various pavilions and other places of the activities to be carried out.

TABLE IN THE TECHNOLOGICAL EXHIBITION
5th National Meeting of Electrical Engineering Students

DESCRIPTION

The technological exhibition consists of an exhibition that will be held in the lobby of the Central Pavilion of the IST Alameda center and which will fit into one of the following areas:

Bank of a company or entity that has acquired it Bank of IST student groups Bank of NEECIST

The presence of companies in the technological exhibition should be as dynamic as possible, namely through demonstration or exposure of technology within the framework of Electrical and Computer Engineering.

It can also be used for recruitment and / or disclosure of stages / courses and other special programs for all students of Electrical and Computer Engineering.

The exhibition will be attended by all participants, including some leaders of the various cores of existing students in the area across the country.

POSSIBLE COMBINATIONS

5th National Meeting of Electrical Engineering Students

The following table listed the prices to be applied as the various combinations:

	Silver	Gold
Logo		
Flyer		
Posters in local ENE3	-	
Banking in technology exhibition	-	
-	300 €	500 €

In addition to these combinations, companies can also contribute to gender:

Gifts given to participants such as pens, notebooks, t-shirts, key holders, folders, USB pen's, etc;

Offer meals such as coffee breaks and breakfasts (eg bread, cakes, fruit, ham, milk, juices, etc.);

It may also be equated one transfer of technology products.

PAYMENTS

5th National Meeting of Electrical Engineering Students

Payment will be made after submission of invoice by the NEECIST (TIN: 111111111), which is the legal entity that supports the ENE3.
