@LISBOA

5th National Student Gathering Electrical Engineering

Lisbon

3 the September 6, 2014

O EVENT

5th National Meeting of Electrical Engineering Students

THE 5th edition of the National Meeting of Electrical Engineering
Students will be first performed in Lisbon at the Instituto Superior Técnico of Lisbon. The organization of the meeting consists of core students of Electrical Engineering and Computer Students and has the support of the area and the institution's department.

pole Alameda

As the Master Integrated Engineering Electrical and Computer is associated with the pole of Alameda, it is here that the ENE3 held mainly in spaces prepared to receive the participants, and which will be carried out various activities within the academic context of the meeting.

Participants also have the opportunity to visit some research centers and laboratories such as the Institute for Systems and Robotics, the Institute of Telecommunications and INESC ID.

"The campus of Alameda was built under the direction of Duarte Pacheco [...] conceives
O first autonomous campus around the Portuguese university system. The campus is located in the most central areas of the city, benefiting from public transport [...]"

(In tecnico.ulisboa.pt/pt/sobre-IST/localizacao/)

pole TagusPark

We will visit the facilities of this pole and carried out some activities on site.

This pole is associated with focus on area courses such as Electronics and Telecommunications Engineering and Computer Engineering.

O EVENT

5th National Meeting of Electrical Engineering Students

The meeting also has a cultural component, whose aim is to inform the city of Lisbon to the participants.

It is intended that all have the opportunity to enjoy the largest city in the country, including the most characteristic sites of the same.

This component aims to have a playful side, making known the heritage, history and architecture of the city of Seven Hills, while giving the possibility of participants relax and enjoy the visits.

The visit will take place mainly at the waterfront of Lisbon, which houses the most paradigmatic neighborhood in terms of assets related to the discoveries.

PROGRAMME

5th National Meeting of Electrical Engineering Students

The ENE3 program then will feature various activities inserted in the Electrical area:

Speeches

Panel discussion Workshops

Visits to research centers Visit the
technological exhibition company

PATROCÍNIOS

5th National Meeting of Electrical Engineering Students

That said, the organizing committee of the 5th ENE3 hereby propose a partnership between your company and this event, covering the following activities:

Disclosure of the company's logo on posters Flyer
placement offering in the folder ENE3 Banking sites in
technology exhibition

D COMPANY LOGO OF ISSEMINATION

5th National Meeting of Electrical Engineering Students

DESCRIPTION

This package consists of the disclosure of the company logo in all media that ENE3 has at its disposal.

RELEASE MEDIA

Official website of ENE3
